ABSTRACT

This study aims to find out and describe in detail how the implementation of state property management policies at the Jember State Polytechnic. The research method used is descriptive qualitative research method. Data collection techniques are carried out by means of interviews, observations and documentation related to the management of state property. This research was conducted with a theoretical approach to the policy implementation model of Donald Van Meter and Carl Van Horn which has the following policy implementation indicators: policy standards and objectives, resources, communication between implementing agencies, characteristics of implementing agencies, social, economic and political environment, and attitudes. implementers/dispositions. The results showed that the management of state property carried out at the Jember State Polytechnic was in accordance with Government Regulation Number 28 of 2020 concerning Management of State/Regional Property and was also in accordance with the theory developed by Van Meter and Van Horn. There are six variables proposed by van meter and van horn, one of which is the resource variable which is a problem at the Jember State Polytechnic. These problems arise due to the low educational competence of the managers of state property owned by the Jember State Polytechnic.
