ABSTRACT

One of the shops in the Probolinggo area is the Bosshit Shop Streetwear is a shop that sells various kinds of clothes Addressed at Jalan Teuku Umar - Probolinggo. Based on the results of observations and interviews, Bosshit Streetwear Stores are still using the process sales transactions and reporting are still done manually namely by writing it down in the ledger, even to find out availability of goods the shop owner must check from time to time so can find out what items will run out. Hence the Shop Bosshit Streetwear needs a computerized system for make it easier for all types of transactions to find out availability goods and know sales reports and purchase reports. Based on these objectives, this application can make it easier the owner makes transactions, and makes it easier for cashiers in making and storage of sales reports in the Bosshit Streetwear Store.
