ABSTRACT

This study seeks to assess the Village Financial System Application Evaluation (SISKEUDES) in Ajung Village, Ajung District, Jember Regency in increasing the level of regional financial accountability. This study uses a descriptive methodology and is qualitative in nature. Data collection was carried out by in-depth interviews and documentation which were then processed in three stages, namely data reduction, data presentation, and drawing conclusions. Triangulation testing of data sources and use of reference materials was used to determine the validity of the data.

The results of the study show that Ajung Village has implemented the SISKEUDES Application as a whole, carried out related accountability procedures in the input and reporting process, so that it can be said that the implementation of the application has been well structured.
