ABSTRACT

Cowhide is a commodity that is widely used in Indonesia. Rambak crackers are a product made from cowhide as raw material. The relatively stable demand for rambak crackers makes competition between producers increasingly tight, therefore every producer is required to always maintain and maintain the quality of the products produced. This research aims to find out whether UD Special 1 processing Rambak crackers applies Good Manufacturing Practices (GMP). This research is classified as descriptive research with a qualitative approach. Where research procedures provide descriptive data in the form of written words by describing or depicting the current state of the research object, based on visible facts or as they really are. The research results of the data analysis technique used in this research are qualitative analysis, analysis is used to determine conformity with aspects of Good Manufacturing Practices (GMP) in writing. Then solutions are sought for deviations from aspects of Good Manufacturing Practices (GMP) using cause and effect diagram analysis. Then there will be several suggestions for improvements that will be proposed for companies in order to maintain their quality.

Key words: Rambak Crackers, Good Manufacturing Practices, Food Safety.
