CHAPTER 1. INTRODUCTION

1.1 Background Knowledge

Nowdays the development of technology has risen rapidly ecpecially programing field. It can not be denied that the utilising programing is having bigrole to design and develop web.The programing tool is use by several programmer namely framework PHP. Fremework PHP is a tool that assist designing and develop website easier. There are lots of framework PHP that have function to design and develop website. One of them is laravel. Laravel is a web application frameworkused for designing fast and easy web applications.Laravel was created for website application developmentand website apllication design.

 Due to the effectiveness of laravel framework, it is used by Informatics Engineering Study Program of Politeknik Negeri Jember as one of material that given to the students.Informatics Engineering is one of the Study Program of majoring Information Technology that focused on the learning of information system such as making website. This Study Program uses a learning video entitle "Laravel PHP Framework Tutorial - Full Course for Beginners (2019)". This learning video is taught for fourth semester of workshop web framework subject since 2019 and it will be used in 2021. It uses to help the student in understanding further concern of how to install the laravel. The video duration is 4 minutes and 45 seconds. Unfortunately, the video is in English version that makes most of students find it difficult to conceive the information conveyed by the native speaker in the video. This is because they have limited language knowledge especially in English.

 The writer obtained a recommendation from the lecturer to making a subtitle in learning video. The video had been used since on 2019. The video is aimed to train the students' intelligent through audio-visual and in order to make them easier in conducting practice class. The learning video will be also continued to be usedfor the next yearstudents especially for 4 semester of Informatics Engineering Study Program.For that reason, it will be better if the video completing by Indonesian subtitle. In addition, the purpose of using the video in the teaching process is to assist the student in understanding the workshop web framework subject especially

for how to install the laravel through audio-visual that aid easier. By the availability of subtitle on the learning video will make the students able to overcome the misunderstanding of the overall information conveyed. So the writer accept the recommendation from the lecturer to provide the subtitle in the learning video namely "Laravel PHP Framework Tutorial - Full Course for Beginners (2019)".

1.2 Objective

The objective of this final project is to subtitle the learning video of workshop web framework subject entitled "Laravel PHP Framework Tutorial - Full Course for Beginners (2019)" with Indonesian subtitle.

1.3 Significances

Based on the objective, this final project will be definitely giving the advantages to the following parties:

1.3.1 To the Writer

This final project was giving a challenging experience to the writer to apply his skills that have been learned in English Study Program especially Writing, Translation, Listening and Computer.

1.3.2 To the Students of Informatics Engineering Study Program

This final project hopefully can be able to help the students of Informatics Engineering Study Program by providing a subtitle as the learning video with Indonesia subtitle, so the information that have already given in the learning video especially "Laravel PHP Framework Tutorial - Full Course for Beginners (2019)". Becomes easier to be understood.

1.3.3 To the Student of English Study Program

This final project can be reference for the students of English Study Program who have similar final project.
