ABSTRACT

Mitra Sehat Besuki Clinic is one of the Clinic That have not had website for information and promotion to community yet, so that the community lacks of information regarding to the clinic. This is a qualitative research by using waterfall model system design method. The steps in this research is including Requirement Analysis and Definition, System and Software Design, Implementation and testing, Integration and system testing and Operation and maintenance. This research was aimed to design and create a website Mitra Sehat Besuki Clinic. It is hoped that this website can assist clinic in delivering information on health services and health promotion while at the same time assisting the public in receiving information related to clinic.

Keywords: clinic, website, information, promotion
