***ABSTRACT***

*Jember State Polytechnic has a repository website called the Asset Repository Polije Information System or SIPORA which contains local works of the academic community such as final assignments, theses, journals, and so on. This study aims to analyze the level of user satisfaction of the Asset Repository Polije Information System (SIPORA) using the UTAUT (Unified Theory of Acceptance and Use of Technology) method. Data was obtained through a questionnaire distributed to 407 respondents who were users of the Asset Repository Polije Information System website. The analysis results show that the level of user satisfaction with the system is in the strongly agree category with an index of 80.3%. This indicates that the majority of users are satisfied with the Asset Repository Polije Information System.*

***Key words:*** *Repository, Polije Information System Asset Repository (SIPORA), UTAUT*
