***ABSTRACT***

*This research, titled "Agrotourism Business Model Development Strategies in Utilizing the Potential of Rowosari Village, Sumberjambe District, Jember Regency," is motivated by the untapped potential of Rowosari Village for agrotourism development. The objective of this research is to formulate effective and sustainable agrotourism business model development strategies in Rowosari Village. A qualitative descriptive method with a case study approach was employed with analytical tools AHP, SWOT, and TLBMC. Data were collected through observation, in-depth interviews with various stakeholders (farmers, tourism managers, village government), and document review. The research results indicate several agrotourism business model development strategies, including the development of agricultural-based tourism products, improvement of human resource quality, development of supporting infrastructure, and targeted marketing strategies. In conclusion, developing of an agrotourism business model in Rowosari Village requires integrated planning and strong collaboration among various stakeholders to achieve success and business sustainability. The formulated strategies are expected to improve the economy of the Rowosari Village community through the utilization of local resources.*
