ABSTRACT

Travel planning application on the Kanesma Tour And Travel is a desktop application which can provide information on attractions, hotels, restaurants, and transportation to facilitate the tour planner in designing a trip, in addition to describing the information this application can also be used in the processing of approval so that it can minimize the time. The data used was obtained from the kanesma tour and travel, supplier Kanesma tour and travel and the internet. On the final results of these applications will display the data tour program along with the tour itinerary and invoice form.
