**ABSTRACT**

*Application of Information Technology is indispensable for any company, whether a profit-oriented company (for profit) and non-profit. One example is the company's profit Umrah travel services company that aims to deliver Umrah pilgrims reached Mabrur, build fair partnerships, build sillaturrahi and comfort while praying. One of travel umrah agency is "Al Ghaazalie Citra Utama" Group. In each every departure dispatch jama'ah average of 100 people each month. This calls for good management to manage payment transactions and the jama'ah data management. Of these problems needed information systems. In the development of this system is in use tools UML (Unified Modeling Language) diagram consists of Usecase Diagram, Activity Diagram, sequential Diagram, Class Diagram. Participate in the development of this system using the programming language PHP application using Adobe Dreamweaver.*
