ABSTRACT

SMKN 2 Kraksaan as sanctioned gatra Education Center strives to provide the best service for those students. But still pick some hearts lack documentation students value recapitulation data, singer caused because system used manual systems.

The singer of the system, resulting in slow data Students value, document value students will perishable and lost and it's hard to look for when needed because using manual systems. Thus requiring more system fast and the system that process is efficient computerized.

Application recapitulation of value as a means of prayer the most convenient way value data to review students and the result is more efficient process, has positioned hearts role that is accelerating students value data. By there for a teachers are required to review data that provide value the process is efficient in accordance with standards set and can be reach Whole Students 2 Kraksaan.

Searching google pages singers their computerized system is expected care and more process data efficiently, so that teachers more fast data obtained value of students students. So that the project can be made a recapitulation of Value-based web.
