

AplikasiTuntunanShalatSunnahBerbasis Android.
(Application Guidance Based Sunnah Android Salah)

ABSTRACT

Kristin Nova Diana

Program Studi ManajemenInformatika

Jurusan Teknologi Informasi

It is most prominent in the development of information technology is android. Android plays an important role as an alternative learning. Especially the study of religion, the Prophet S.A.W. said: "Teach your children to pray at the age of 7 years, and their laws (if not the prayer) at the age of 10 years. Prayer is the most important worship for Muslims. In the Qur'an, Allah says, "Keep all the prayers (mu), and (guard) wusthaa prayer. Stand up for God (in your prayers) with humility "' (Q.S. Al-Baqarah: 238).

Activity methods used in making this application is the waterfall method.

The results of this application is the sunnah prayer guidance applications based on Android, which can yield information on the sunnah prayers, making it easier for users to learn sunnah prayers.

Keywords: Guidance sunnah prayers, Android, waterfall.
