## ***ABSTRACT***

Angkringan comes from the Java language is Angkring which means sitting relaxed. Angkringan is also interpreted as a tent that sells various kinds of food and beverages are usually sold at every side of the road in Central Java, such as Yogyakarta. Joglo style house is not covered with walls so it can enjoy a typical dish of angkringan with a cool breeze, so that place angkringan made outdour and sitting chair can, then in the yard with a small lamp decoration. Therefore the owner has an inspiration for his business with the name Angkringan Joglo 130. Angkringan Joglo Panjahitan has a problem that is for reservations where consumers must come directly to the place of Angkringan Joglo Panjahitan and to know the food also consumers must also to place Angkringan Joglo Panjahitan. When marketing in social media only some food and beverage menu that is uploaded in social media. In addition, Angkringan Joglo Panjahitan is only marketing about the food and beverage, there is no notification about the place in Angkringan Joglo Panjahitan it was already booked or not. Recommended system created using Prototyping method, Prototyping Method is method that has characteristic of listening customer. The research was conducted using prototyping methodology. The system used to review the design of the Power Designer tool to review that is DFD (Data Flow Diagram), DFD level 0, DFD level 1, DFD level 2. In the preparation of the system used tools Adobe Dreamweaver and XAMPP with PHP programming language.
