ABSTRACT

Increased cases of motorcycle theft, make people afraid to parking their vehicles. Many people innovate to create a motorcycle security tool. Many security tool only make the thief fears, difficulties, and finally escape. Therefore, the authors make this final project is expected to facilitate motorcycle owners to controling and get information from the motorcycle via SMS. The author makes the title of final project is "Design Build Motorcycle Security Tool With Short Message Based Microcontroller".

Keywords: Security tool, Motorcycles, SMS.
