Salary is a form of payment for the delivery of services performed by administrative staff or who have managerial level in general and paid monthly. Where in the company or agency that every day to process a lot of data both teaching data and payroll data. Data processing Payroll using a computer is a must, because the amount of data that must be processed and the information produced must be fast and precise. Moreover, the information must always be on time every month. Of course if only relying on human labor will not be enough with the time that has been determined because of the limitations that have been owned by humans.

With the zakat Payment Information System Profession based on Salary Employees in this agency can assist the personnel to process payroll data and zakat deductions for each monthly salary to be saved and paid later at the end of the year and can provide precise information, fast and accurate
