

## **ABSTRACT**

**BAYU WAHYU PRASETYA WIBOWO**; Savings Modul Development in Information System of Sharia Cooperative Using CodeIgniter; Guided by Agus Hariyanto, ST, M.Kom (Supervisor I) and Dessy Putri Andini, S.E., M.M. (Supervisor II).

Cooperative sharia is a business entity doing business with the principles of Sharia. Inside there is a sharia cooperative services, namely savings and financing. Savings there are three types of savings, compulsory savings and voluntary savings, which will be used as a source of capital or funds in the cooperative sharia. So each member savings requires reports that can provide timely and accurate information in its calculations.

Computerized systems see fit to complete the existing Islamic cooperative today, in order to obtain information easily and calculations are accurate and precise. So the new system is expected to improve service and management of the cooperative sharia. In the ease of use of the module deposits are made, the author uses the CodeIgniter framework for building dynamic websites.

Keywords : Cooperation, Sharia, Savings, CodeIgniter.
