ABSTRACK

The purpose of this final project is to create a program specifically for payment of hotel information systems Pearls Garden. In this case I want to make the payment information system application program becomes easier by the user. The method used in obtaining the data and information required includes collecting data by interview, observation, and analysis methods is to conduct ongoing surveys, and planning methods. The results of the analysis and planning applications of these systems are expected to provide the ease of system processes payment information easily, quickly and precisely thus saving time and costs. The conclusion that can take the writer with the activities and planning of the new billing information system, it is expected to improve the quality of systems and storage or data search process that can be done easily and quickly.
