ABSTRACT

Build Akademik Information System of SMK N 5 Jember Web Base is a computerize information system which can help easier of academic service over there. This information system give the result of daily test, mid-semester test and final test. In build of this, validation data and correct data from SMK is needed. Besides that, academic information system which planted over there still using manual system and less efficient. FYI built an academic information system which can easier the job and held a web base that can be access wherever and whenever. Besides that, almost every school which have gotten high class shool using website as an alternative to easier the service. On the academic information system got result the mark or value of the student.
