ABSTRACT

Information system is a system within an organization to bring together the needs of daily transaction processing, support operations, managerial and strategic activities of an organization and provide certain outside parties with the necessary reports. One is the Sales Information System Based Mobile Pulse on Aifa Cell. Cell Aifa a pulse sales agents all operator, recording all data transactions that occur in Aifa Cell is still done manually, so Aifa Cell still having trouble when will recapitalize sales data pulses, recapitalize transaction revenue, recapitalize pulse billing data for customers, with the system credit sales information can help the Aifa Cell to provide information about the sales transaction data pulses. Aifa Cell itself does not yet have a system that can coordinate all the transactions that occur in the form of a website that can be accessed through a web browser on a mobile phone. The sales information system can display the transaction data, the data member registration, balance the addition of data, billing data and income data entered by the user according
