

CHAPTER 1. INTRODUCTION

1.1 The Background

English breaks the barrier among the nations in this world. Almost every single citizen in all country needs English as the medium to communicate. English exist in every part of our life, from the kitchen tools instruction until gadget we have, all are using English. Unfortunately not all people understand English. People who have close relation with English in their life need to improve their English, especially students.

Students of elementary school get English lesson in their school to improve their knowledge in English. Although they get English lesson, it does not mean that the students get satisfactory knowledge. They only have a little time to learn and get new knowledge of English from their school, but they also want to get a good score in writing test of their school. As we know that the ministry of education and cultures already change the curriculum. He makes English lesson for elementary school just for additional subject, so young learners do not get English well. Actually English is needed for young learners because technology in globalization era increases every year, as we know technology use English. That why, there are a lot of students who need additional subject in English for example from English Course. That condition make a good prospect for English Course, so we interest to establish English Course especially in mastrip regency.

Nowadays, in Mastrip regency already has English course. Teddy's English course is just the one of English course there. We have already done observation and unguided interview we interview some of the students and some parents and we get the conclusion why the young learners in Mastrip regency does not want to learn there. For the first reason Teddy's English course is very expensive it is around 25.000 per meeting and it makes the parents are not interesting to bring their children to join in Teddy's. Second is because in Teddy's the young learners do not get material from Teddy's so they learn from their school book and make they cannot improve their knowledge about English.

Based on this case, because English so important thing for the young learners so we decided to establish English course for young learners or elementary student in Mastrip regency in district of Summersari, Jember. We will establish this course we want the young learners more attractive, and more diligent in English, We make this proposal as our final project and we give the title “Establishing an English Course for Elementary Student in Mastrip Regency.”

1.2 The Objectives

The objectives of our final project are:

1. To improve our skill in teaching English for elementary students
2. To increase our managerial skill to handle English course
3. To provide distinguish English course for elementary school

1.3 The Significances

There are some of significances from this project

1. For the Learners

The learners have a new appropriate course to help them to improve their English.

2. For English department student

To inform about managerial in the English course and to inform the procedures English course in the real society.

3. For writer

To apply our knowledge in managing English course as well as to applicant our ability in English.
