**ABSTRACT**

*Maternal and Child Health (MCH) is one of the main programs in health centres which has high priority, remembering that pregnant women, breastfeeding, child and baby are vulnerable groups to morbidity and mortality, one of the health information systems for mother and child in Tamanan Village, Bondowoso regency. Bondowoso has launched Healthy 2012 through relevant services about doing some effort that are general hospital revitalization, Hospital Centres, Polindes, Posyandu, poor health services, which have the purpose of increasing the performance of each health facility in supporting the implementation of health development. This health information system for mother and child can help health officers to give information, condition and health progress of mother and child that happen in that place and data searching which equipped appropriate data searching for baby or child and parent mother, so as to ease data searching and map exists in this system as a location index where this activity happens and website used to map for that location using Google Maps.*
